Amazon S3 > Buckets > jayaadithyabucket > Edit static website hosting
Edit static website hosting Info
Static website hosting
Use this bucket to host a website or redirect requests. Learn more
Static website hosting
Disable
Enable
Hosting type
Host a static website
Use the bucket endpoint as the web address. Learn more
Redirect requests for an object
Redirect requests to another bucket or domain. Learn more
For your customers to access content at the website endpoint, you must make all your content publicly readable. To do so, you can edit the S3 Block Public Access settings for the bucket. For more information, see Using Amazon S3 Block Public Access
Index document
Specify the home or default page of the website.
jay.html
Error document - optional
This is returned when an error occurs.
error.html
Redirection rules - optional
Redirection rules, written in JSON, automatically redirect webpage requests for specific content. Learn more

Amazon S3 > Buckets > jayaadithyabucket > Delete objects
Delete objects Info
If a folder is selected for deletion, all objects in the folder will be deleted, and any new objects added while the delete action is in progress might also be deleted. If an object is selected for deletion, any new objects with the same name that are uploaded before the delete action is completed will also be deleted.
Deleting the specified objects can't be undone.
